

Support for Prestashop

This document explains the necessary steps to offer Pay with Amazon on your website. You will need to register a Pay with Amazon account and enter your Merchant ID and MWS access keys within Prestashop.

1. Register for Pay with Amazon account:

Register for Pay with Amazon

We recommend using a separate email login to your personal Amazon shopping account or Amazon Marketplace account (if you have one).

2. Verifying your account in Seller Central

Once registered, you need to verify your account by logging into Seller Central:

<https://sellercentral.amazon.in>

- ▶ Using your email and password created in step 1
- ▶ Ensure you are in the Pay with Amazon (Production mode) using the dropdown box in the top left of the page.
- ▶ Navigate to “Settings” > “Account Information” or use the alert link from the home page.

Enter Bank Account details

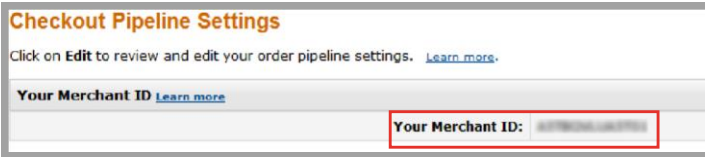

To enable funds transfer, you will need to add bank details in Seller Central. Within the Account information page, scroll down to “Deposit Method” and select “Add”. From the Global Bank Account Information page, please add:

- ▶ Bank Name, Short Code & Account Number
- ▶ Bank Account holders Name

3. Finding your Merchant ID

This step can be done while the account is pending business verification.

3.1 – Select Settings > Integration Settings, provide merchant ID in your Prestashop backend (see step 5.3)

Checkout Pipeline Settings

Click on **Edit** to review and edit your order pipeline settings. [Learn more.](#)

Your Merchant ID [Learn more](#)

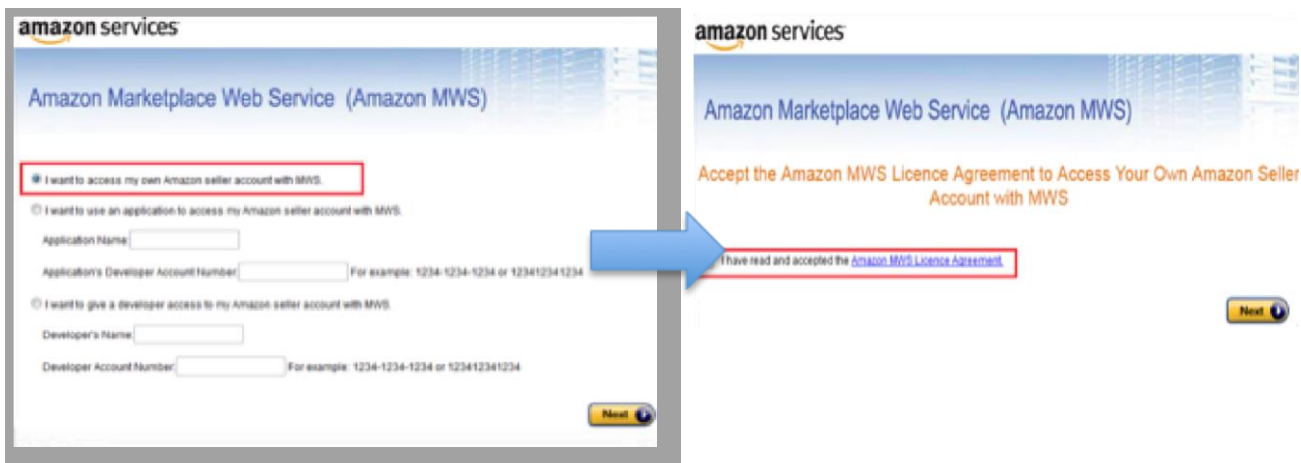

Your Merchant ID:

4. Creating your MWS access keys

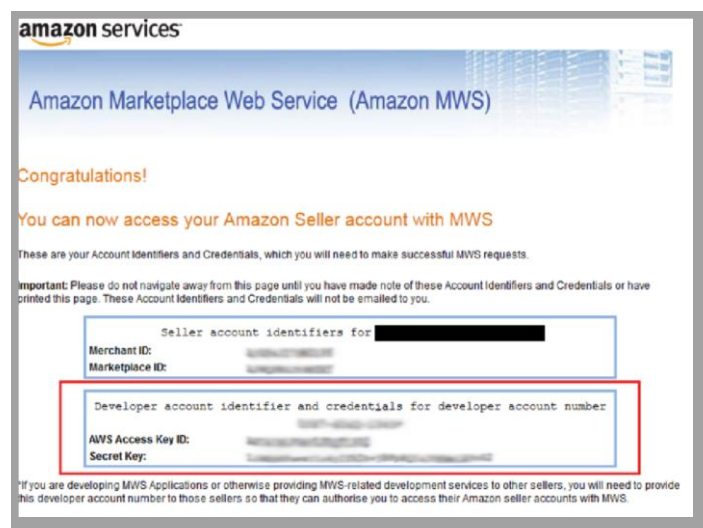

4.1 -Log into Seller Central: <https://sellercentral.amazon.in>

- ▶ Using your email and password created in step 1
- ▶ In another tab on the browser, go to <https://developer.amazonservices.in/index.html>
- ▶ Click on the “Sign up for MWS” button on the right hand side.

4.2 – Select “access own Amazon Seller account with MWS” and accept the Amazon MWS license.

Here are the MWS access keys you should enter into your Prestashop back end (see step 5.3):

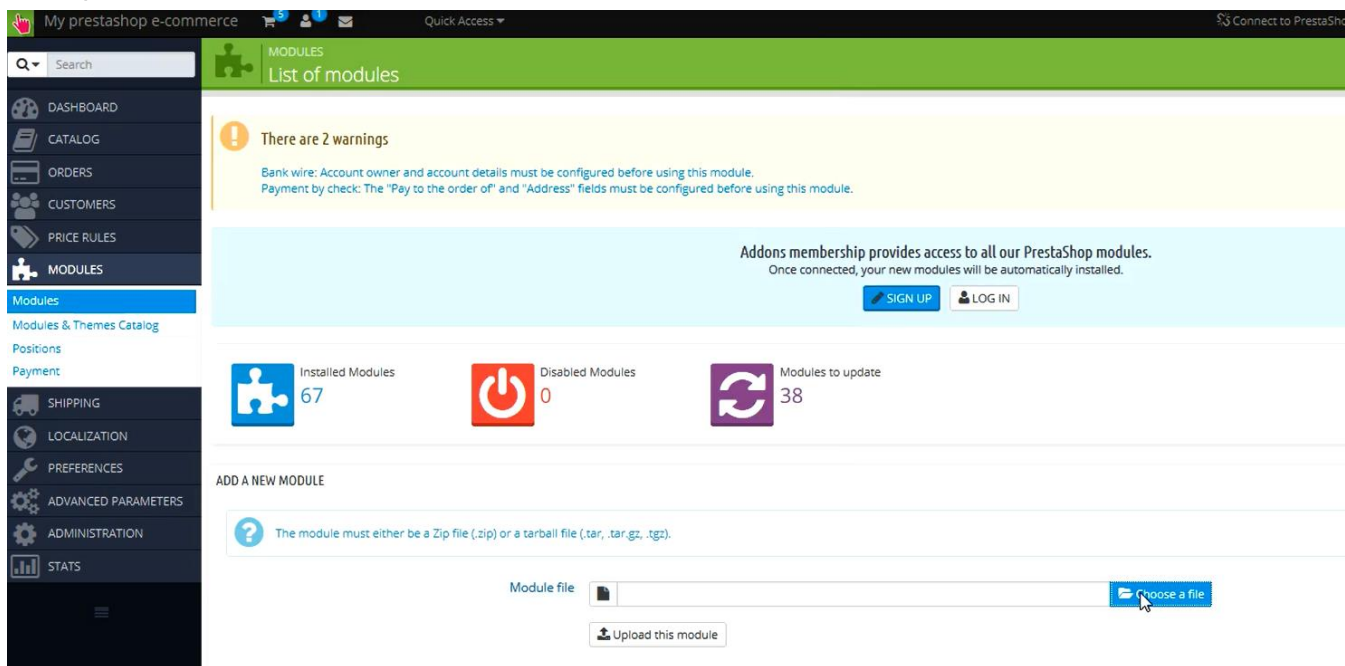

5. Configuring Pay with Amazon in your Prestashop store:

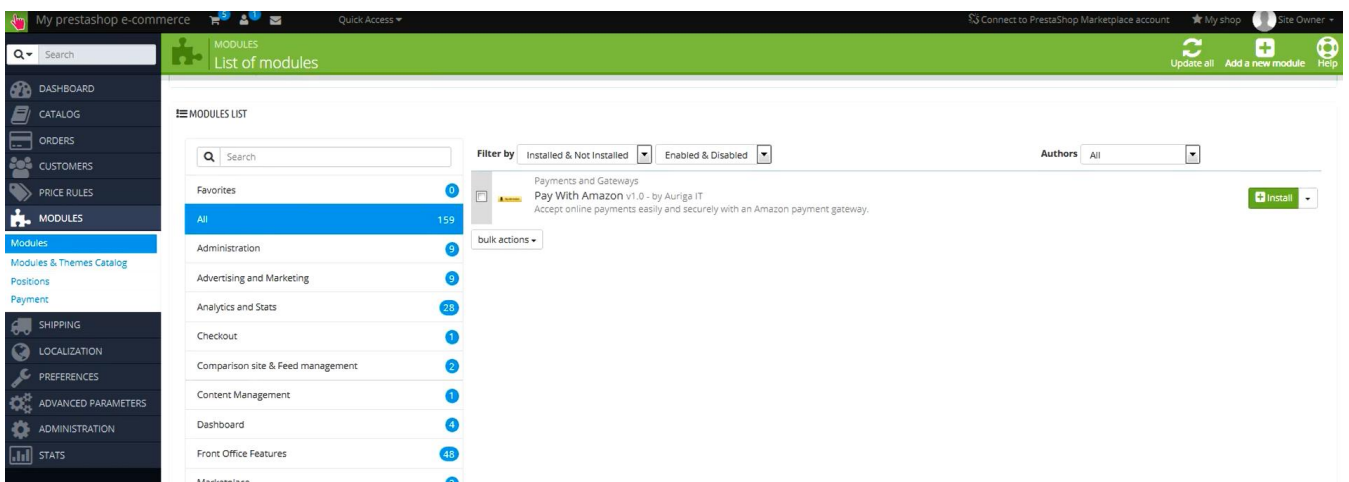

5.1 – Download the zip file from:

https://drive.google.com/file/d/0B1jT2dtcXF_hbXdOSHAXdkZ3YUE/view?usp=sharing

5.2 – Login into your Prestashop back office. Click the Modules tab and then the Add new button. Browse and Select the zip file 'pwa.zip' you have just downloaded. And click upload this module.

Now Pay with Amazon module will display then Click Install then Configure

Pay with Amazon IOPN AND MWS SETTINGS

Successful Payment Return Url:
Use this url in amazon seller central settings.

Use IOPN or MWS Report API: IOPN
IOPN will be preferred over MWS. But IOPN will only work if SSL is enabled on server. MWS is cron based so you need to setup cron. So It will only update the details when cron will run.

Enable IOPN for debugging purpose: ☐ YES ☒ NO
Will be in effect only when IOPN is enabled.

Set Path for IOPN dump file:
Type the path of folder for IOPN dump file.

IOPN Merchant Url:

Enable to generate MWS Order Dump file: ☐ YES ☒ NO

Set Path for MWS Order dump file:
Type the path of folder for MWS Order dump file.

MWS Order API Url:

Enable to generate MWS Report Dump file: ☐ YES ☒ NO

Set Path for MWS Report dump file:
Type the path of folder for MWS Report dump file.

Enable/Disable PWA button on cart page: ☐ YES ☐ NO

Choose a colour for the button: ☐ ☐

Choose a size for the button: ☐ ☐

Enable custom image for PWA button: ☐ YES ☐ NO

Choose custom PWA button image:

On the same page you will also find the following options:

Sandbox test mode – When on all transactions are on the Amazon test servers, so no money changes hands. A good way to test that the module is setup correctly.

Use IOPN or MWS – Pay with Amazon will send the customers details and payment confirmation directly to your store. This requires a valid SSL certificate when not in sandbox (test) mode. If you do not enable this you will have to manually import orders or setup a CRON to process orders. It is highly recommended you keep this option enabled, and invest in a SSL certificate if you don't have one already.

Once all settings are done Click Save changes.

5.4 – Settings in seller central

- Go to Seller Central <https://sellercentral.amazon.in>
- Login With your credentials
- Go to Settings -> Integration Settings -> Edit
- Add Successful Payment Return URL under Checkout Pipeline Settings. (http://www.domainname.com/prestashop/module/pwapresta/pwaorder?action=pwa_order.)
- Update the Account Info section under the Settings tab
 - Customer Service Phone
 - Contact Telephone Number
 - Contact Email Address
 - Bank Account Information
- Update the Notification Preferences under the Settings tab
- Update the Shipping Settings under the Settings tab – you can apply either of the below:

- Item Based/Weight based (If the seller intends to levy a shipping cost per item/kg)
- Price banded (If the seller intends to charge a flat rate for fixed price bands)

5.5 – Setup IOPNs Properly

To make IOPN works properly you need to follow these steps.

1) Set "Merchant URL" or "Integrator URL" under Instant Order Processing Notification Settings in Integration Settings in Seller Central.

https://www.example.com/prestashop/module/pwapresta/pwaiopn?action=pwa_iopn

Note : -

- You need to provide a valid SSL URL, Because IOPN will work only with Secure URLs. You can find this URL on PWA plugin settings page named as "IOPN Merchant Url".

5.6 Setup MWS Properly

1) Schedule MWS Report by hitting the "MWS Schedule Report API Url" manually (Only hit once).

You can find this URL on plugin settings

page(http://www.example.com/prestashop/module/pwapresta/pwamws?action=pwa_mws_report_schedule).

2) Setup cron jobs to fetch generated report automatically and reflect orders in Prestashop admin panel. You need to setup cron on "MWS Report API Url"

(http://www.example.com/prestashop/module/pwapresta/pwamws?action=pwa_mws_report)and "MWS Order API Url"(http://www.example.com/prestashop/module/pwapresta/pwamws?action=pwa_mws_order).

You can find respective cron URLs on plugin's settings page.

Note: - To setup cron please concern with your developer or your host provider.

5.8 – Check the cart/Checkout page of your store.

Pay with Amazon will now be available and the "Pay with Amazon" button will be visible.

5.9 – Pay with Amazon Logo Placement:

Include the Pay with Amazon logo on your website wherever you feature payment providers as well as a banner announcing the introduction of Pay with Amazon on your website. Letting customers know about Pay with Amazon as early as possible in the shopping process can help increase conversion and reduce cart abandonment. For the latest selection of graphics, please visit

<https://paywithamazon.amazon.in/merchant/tools>

6. Place test Order using Pay with Amazon in your Prestashop store:

You should verify customers can successfully place an order through Pay with Amazon and it can be managed correctly. To do this, we recommend placing a test order on your website.

- ▶ Log out of Amazon Seller Central and add at least one item to your Prestashop cart (ideally take the cheapest item in the shop).
- ▶ Pay with Amazon using an Amazon customer account (not your seller account).
- ▶ After a few minutes the customer account will receive a shipping confirmation email from Amazon.
- ▶ As the customer account will be charged, you should now process a full refund.
- ▶ Amazon will confirm the refund via email.

Congratulations you have successfully completed the Pay with Amazon implementation!
