

Support for Woocommerce

This document explains the necessary steps to offer Pay with Amazon on your website. You will need to register a Pay with Amazon account and enter your Merchant ID and MWS access keys within Woocommerce.

1. Register for Pay with Amazon account:

Register for Pay with Amazon

We recommend using a separate email login to your personal Amazon shopping account or Amazon Marketplace account (if you have one).

2. Verifying your account in Seller Central

Once registered, you need to verify your account by logging into Seller Central:

<https://sellercentral.amazon.in>

- ▶ Using your email and password created in step 1
- ▶ Ensure you are in the Pay with Amazon (Production mode) using the dropdown box in the top left of the page.
- ▶ Navigate to “Settings” > “Account Information” or use the alert link from the home page.

Enter Bank Account details

To enable funds transfer, you will need to add bank details in Seller Central. Within the Account information page, scroll down to “Deposit Method” and select “Add”. From the Global Bank Account Information page, please add:

- ▶ Bank Name, Short Code & Account Number
- ▶ Bank Account holders Name

3. Finding your Merchant ID

This step can be done while the account is pending business verification.

3.1 – Select Settings > Integration Settings, provide merchant ID in your Woocommerce backend (see step 5.3)

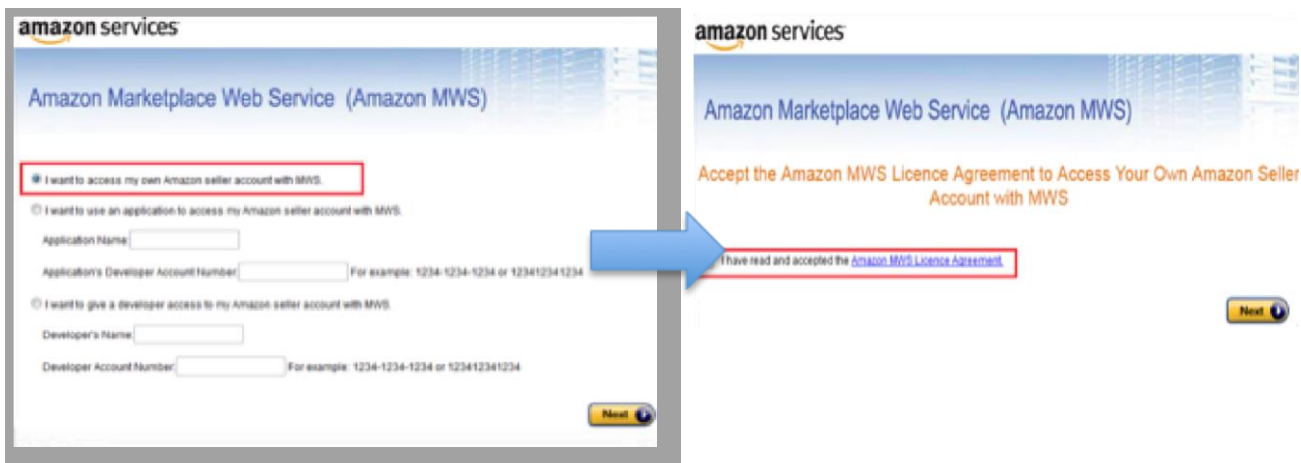

4. Creating your MWS access keys

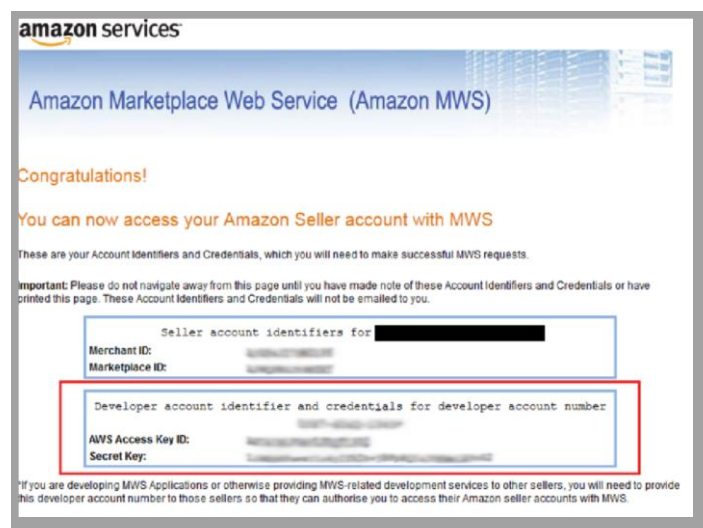

4.1 -Log into Seller Central: <https://sellercentral.amazon.in>

- ▶ Using your email and password created in step 1
- ▶ In another tab on the browser, go to <https://developer.amazonservices.in/index.html>
- ▶ Click on the “Sign up for MWS” button on the right hand side.

4.2 – Select “access own Amazon Seller account with MWS” and accept the Amazon MWS license.

Here are the MWS access keys you should enter into your Woocommerce back end (see step 5.3):

5. Configuring Pay with Amazon in your Woocommerce store:

5.1 – Download the zip file from:

https://drive.google.com/file/d/0B1jT2dtcXF_hb3V0OVNXUUuweVU/view?usp=sharing

5.2 – Login into your Woocommerce back office. Click the Plugins tab and then the Add new button. Browse and Select the zip file 'pwa.zip' you have just downloaded. And click 'Install now'

The screenshot shows the WordPress admin dashboard. On the left, the 'Plugins' menu is expanded, showing 'Pay with Amazon' as an installed plugin. The main content area shows the 'Pay with Amazon' settings page. At the top, there are tabs for 'General', 'Products', 'Tax', 'Checkout', 'Shipping', 'Accounts', 'Emails', and 'We'. Below these tabs, there is a message: 'Want to help make WooCommerce even more awesome? Allow WooThemes to collect non-sensitive diagnostic data and usage information, and get 20% discount on your next!'. Below this message, there are two buttons: 'Allow' and 'No, do not bother me again'. Underneath, there is a section titled 'Checkout Options' with links for 'BACS', 'Cheque', 'Cash on Delivery', 'PayPal', and 'Pay with Amazon'. The 'Pay with Amazon' link is highlighted with a mouse cursor. Below this, there is a section titled 'Checkout Process'.

Pay with Amazon Implementation Guide

5.3 – Enter your Amazon MWS details which can be accessed from Amazon Seller (found in section 4.2).

Pay with Amazon

Enable/Disable ☒ Enable Pay With Amazon

Amazon settings

Merchant ID*:
Merchant Id given by amazon payments.

Access Key*:
An application identifier associates your site, and Amazon application.

Secret Key*:
The secret code from Amazon.

Marketplace ID:
The Marketplace ID from Amazon.

Pay with Amazon Implementation Guide

Show Pay With Amazon Button when

user not logged in ▼

Use IOPN or MWS Report API:

MWS ▼

*IOPN will be preferred over MWS. But IOPN will only work if SSL is enabled on server.
MWS is cron based so you need to setup cron. So It will only update the details when cron will run.*

Successful Payment Return Url:

http://cbapwatest.com/wordpress/pwa_order

Use this url in amazon seller central settings.

Enable IOPN for debugging purpose:

☐ check if you want to generate IOPN dump file.

Will be in effect only when IOPN is enabled.

IOPN Merchant Url:

http://cbapwatest.com/wordpress/pwa_iopn

Generate MWS Order Dump file:

☐ check if you want to generate MWS Order dump file.

MWS Order API Url:

http://cbapwatest.com/wordpress/pwa_mws

Generate MWS Report Dump file:

☐ check if you want to generate MWS Report dump file.

MWS Schedule Report API Url:

http://cbapwatest.com/wordpress/pwa_mws_report

MWS Report API Url:

http://cbapwatest.com/wordpress/pwa_mws_report

Choose a colour for the button:

orange ▼

Choose a size for the button:

medium ▼

Pay With Amazon button view on front end:

Add custom PWA button image:

No file selected.

☐ Delete custom image to show default Pay with Amazon button

On the same page you will also find the following options:

Sandbox test mode – When on all transactions are on the Amazon test servers, so no money changes hands. A good way to test that the module is setup correctly.

Use IOPN or MWS – Pay with Amazon will send the customers details and payment confirmation directly to your store. This requires a valid SSL certificate when not in sandbox (test) mode. If you do not enable this you will have to manually import orders or setup a CRON to process orders. It is highly recommended you keep this option enabled, and invest in a SSL certificate if you don't have one already.

Once all settings are done Click Save changes.

5.4 – Settings in seller central

- Go to Seller Central <https://sellercentral.amazon.in>
- Login With your credentials
- Go to Settings -> Integration Settings -> Edit
- Add Successful Payment Return URL under Checkout Pipeline Settings. (You can find this URL on PWA plugin settings page.)
- Update the Account Info section under the Settings tab
 - Customer Service Phone
 - Contact Telephone Number
 - Contact Email Address
 - Bank Account Information
- Update the Notification Preferences under the Settings tab
- Update the Shipping Settings under the Settings tab – you can apply either of the below:
 - Item Based/Weight based (If the seller intends to levy a shipping cost per item/kg)
 - Price banded (If the seller intends to charge a flat rate for fixed price bands)

5.5 – Setup IOPNs Properly

To make IOPN works properly you need to follow these steps.

1) Set "Merchant URL" or "Integrator URL" under Instant Order Processing Notification Settings in Integration Settings in Seller Central.

Note : -

- You need to provide a valid SSL URL, Because IOPN will work only with Secure URLs. You can find this URL on PWA plugin settings page named as "IOPN Merchant Url".
- Plugin will only accept signed carts IOPN.
- If you are setting both "Merchant URL" and "Integrator URL", make sure both URL should be different, otherwise duplicate orders may be generate.

Check is IOPN URL working properly: -

- Please hit your "IOPN Merchant Url" in browser and if browser didn't give you any 404 error and show blank page it means it's working.
- If browser gives you 404 error then please check your permalinks and .htaccess or try this URL using index.php before "pwa_iopn" in url. ex: https://www.example.com/index.php/pwa_iopn

5.6 Setup MWS Properly

- 1) Schedule MWS Report by hitting the "MWS Schedule Report API Url" manually (Only hit once). You can find this URL on plugin settings page.
 - 2) Setup cron jobs to fetch generated report automatically and reflect orders in woocommerce admin panel. You need to setup cron on "MWS Report API Url" and "MWS Order API Url". You can find respective cron URLs on plugin's settings page.
- Note: - To setup cron please concern with your developer or your host provider.

Check is MWS URL working properly: -

- 1) Please hit your "MWS Report API Url" and "MWS Order API Url" in browser and if browser didn't give you any 404 error and show blank page it means it's working.
 - 2) If browser gives you 404 error then please check your permalinks and .htaccess or try this URL using index.php before "pwa_mws_report" and "pwa_mws" in url.
- ex: https://www.example.com/index.php/pwa_mws_report

5.8 – Check the cart/Checkout page of your store.

Pay with Amazon will now be available and the “Pay with Amazon” button will be visible.

5.9 – Pay with Amazon Logo Placement:

Include the Pay with Amazon logo on your website wherever you feature payment providers as well as a banner announcing the introduction of Pay with Amazon on your website. Letting customers know about Pay with Amazon as early as possible in the shopping process can help increase conversion and reduce cart abandonment. For the latest selection of graphics, please visit <https://paywithamazon.amazon.in/merchant/tools>

6. Place test Order using Pay with Amazon in your Woocommerce store:

You should verify customers can successfully place an order through Pay with Amazon and it can be managed correctly. To do this, we recommend placing a test order on your website.

- ▶ Log out of Amazon Seller Central and add at least one item to your Woocommerce cart (ideally take the cheapest item in the shop).
- ▶ Pay with Amazon using an Amazon customer account (not your seller account).
- ▶ After a few minutes the customer account will receive a shipping confirmation email from Amazon.
- ▶ As the customer account will be charged, you should now process a full refund.
- ▶ Amazon will confirm the refund via email.

Congratulations you have successfully completed the Pay with Amazon implementation!
