

OPENCART 1.5.6.X USERGUIDE

This guide contains all the details regarding installation of pay with amazon (Indian marketplace) plugin for Opencart version 1.5.x.x. The plugin makes use of the default pay with amazon checkout plugin supported for EU and DE marketplaces that comes packed with the standard opencart installation. Uploading plugin files will update the default pay with amazon plugin to enable Indian marketplace and can be used by Indian merchants.

All Amazon payment data are reflected in corresponding payment transactions in Opencart, which are connected with appropriate document entities provided by the Opencart (invoices, refunds, shipping).

Pre-requisites for PwA plugin

Indian marketplace will be enabled once Rs(INR) is activated as currency.

Installation Steps

Please download the plugin from [here](#).

Step 1

Back up your project files and db.

Step 2

Update all the plugin files in your server using FTP to admin, catalog and system folders using an FTP client such as filezilla. Kindly don't try to extract or upload directly using a hosting provider panel such as cpanel as this can sometimes delete certain files and folders.

Step 3

Create new folder 'log' in the following path {opencart-root}/system/library/IOPN (if the folder not exist). Give 777 permission to that folder.

Step 4

To enable the plug-in, navigate to admin > Extension > Payment

Click **install** on Amazon payments. After that you can see the Edit link

Click on **Edit**, now you can see the Pay with Amazon settings

Amazon Payments

Make this long and hard to guess

Cron Job's URL:
Set a cron job to call this URL

Last cron job's run time:

IPs allowed
Leave empty if you want everyone
to see the checkout button

Update Merchant id, Access key and secret key from your seller central account.

Check status as enabled

Checkout mode as live/sandbox

Marketplace as India

Configure the order status

Pending (new order status i.e., before payment authorized by amazon)

Ready to be shipped status (order status after after payment authorized)

Shipped (order status after shipped)

Canceled (order status after order canceled).

Step 5

To get the PWA button in frontend, navigate to Admin > Extension > Modules.

Click **install** on Amazon payments button. After that you can see the Edit link

Click on Edit link, then click Add Module button.

Select layout (e.g checkout)

Select Position (e.g Content Top Or Content Bottom)

Select Status (e.g Enabled)

Step 6 (IOPN)

Login into amazon sellercentral account and set the Merchant URL as

<https://{yourwebsite.com}/index.php/?route=payment/paywithamazon/processiopn>

Step 7 (MWS)

To get the MWS API, please set cron job url.

Get the cron url from admin > Extension > Payment > Amazon Payment > Cron Job's URL.

Cron Job's URL:

Set a cron job to call this URL

[http://c\[redacted\].com/opencart/opencart1564/index.php?route=payment/amazon_checkout/cron&token=\[redacted\]](http://c[redacted].com/opencart/opencart1564/index.php?route=payment/amazon_checkout/cron&token=[redacted])
